All products ¹²

Footnotes

- 1 2020 synthetic dye prevalence data from [Dunford et al. \(2025\)](#).
- 2 Conagra informed CSPI via private communication on 4/16/2026 that "there are no longer FD&C colors in any of our frozen products."
- 3 Danone's CEO said the company is working to determine how it can remove artificial dyes across its portfolio, noting that their products sold to U.S. schools do not contain synthetic colors.
- 4 Ferrero and its affiliated companies, including Ferrara Candy Company, stated they will continue to comply with all applicable laws and regulations regarding food additives, and that their products are safe to enjoy.
- 5 Hormel Foods' [2024 Global Impact Report](#) stated that for 10 years, the company has invested in efforts to enhance and simplify ingredient statements, an initiative that includes removing artificial colors and flavors when possible.
- 6 Kellanova was [acquired](#) by Mars in December 2025.
- 7 Mars stated it is still evaluating alternatives and has not yet identified effective solutions.
- 8 Mars confirmed in May 2025 that it had removed titanium dioxide from Skittles.
- 9 Some media reports suggested McCormick & Company will fully eliminate synthetic dyes, based on a CEO [earnings call](#) discussing reformulation in general terms. McCormick told CSPI (September 2025) that it is reformulating the few retail products containing synthetic dyes and will comply with FDA's 2027 Red 3 deadline but has not confirmed plans or timeline to remove synthetic dyes from all products.
- 10 Reuters reported that Mondelez stated via email it is actively working to transition to natural dyes.
- 11 PepsiCo [aims](#) to migrate to natural colors - or at least provide consumers with the option - in "the next couple years." They have [introduced](#) new versions of Cheetos, Doritos, and Gatorade that contain no artificial colors.
- 12 WK Kellogg informed CSPI via private communication on 1/17/2026 that 'WK's portfolio of foods do not and will not contain any titanium dioxide.'
